

# How many joints per day in Nick's bill?

Remember, Nick's bill says 6 1/2 pounds of pot per person per year is a safe and effective dosage for daily-use patients and users to possess and consume.

## Here's the math

$$\begin{array}{r r r r r} 6.5 \text{ lbs marijuana/year} & \times & 453 \text{ g/lb} & & 2945 \text{ grams/year} \\ 0.4 \text{ grams in a joint} & & & & .4 \text{ grams/joint} \\ & & & & \hline & & & & 7361 \text{ Joints/year} \\ & & & & \hline & & & & 365 \text{ Days} \\ & & & & \hline & & & & 20 \text{ Joints per day} \\ & & & & \hline \hline \hline \end{array}$$
